

Dimmers

HUNT Dimming has been a quality and industry-respected manufacturer of commercial-grade Wallbox Dimmers and Dimming Systems since 1960.

HUNT manufactures solid-state, U.L. Listed dimmers to control Incandescent, Fluorescent (both electronic and magnetic), Low-Voltage, Neon and Cold Cathode light sources. Controls are also available for various Fan-Speed and Motor Control applications.

HUNT Architectural Wallbox Dimmers give you:

- Products dim electronic T8's and CFL's
- Both 0 to 10 Volt and Phase-Control technologies
- Controls for low or high-power applications
- Over 200 stock items that **ship same day**
- The most extensive line of 240/277 Volt controls available
- Custom 277 Volt and 50 Hz controls
- Small lot OEM capabilities
- ISO 9000 products
- Aggressive Distributor Stock program with low minimum stock level

HUNT's [Architectural Dimming Systems](#) are easy-to-understand, simple-to-use, and economical. Many applications require only a few simple presets or slides. Systems that most everyone understands.

HUNT Dimming is proud to be an EPA EnergyStar® Buildings Ally.

All HUNT products are made in the U.S.A.

Dimmers

0 to 10 Volt D.C. Controls for Dimmable Electronic Fluorescent Ballasts

HUNT Dimming has a full line of 0 to 10 Volt D.C. controls for use with dimmable electronic fluorescent ballasts. These dimmers provide linear lighting control from 100% to 5% of rated lumen output and are available for both 120V and 277V applications. HUNT's Eclipsis series model PS-010 specification-grade, preset slide wallbox dimmer is for use in low-amperage applications controlling up to 40 T8 lamps. The model FD-010 modular system incorporates a unique wall mounted, single-point-of-control preset slide unit with a remote-mounted module for high-amperage applications controlling up to 100 T8 lamps. HUNT's 0 to 10 Volt dimming controls support ballasts manufactured by Advance, Motorola, Prescolite, ESI, MagneTek/Universal, GE, and Osram/Sylvania.

Dimmers

Phase-Control Dimmers for Dimmable Electronic Fluorescent Ballasts

HUNT Dimming has a full line of Phase-Control (Two-Wire) dimmers for use with dimmable electronic fluorescent ballasts. These dimmers provide continuous, flicker-free dimming control from 100% to 5% of rated lumen output and are available for both 120V and 277V applications. HUNT's Eclipsis series model PS-600 Phase-Control specification-grade, preset slide wallbox dimmer is for use in low-wattage applications controlling up to 20 T8 lamps. The FD series Phase-Control modular systems incorporate a unique wall mounted, single-point-of-control preset slide unit with one or several remote-mounted modules for high-wattage applications controlling up to 800 T8 lamps. HUNT's Phase-Control dimming products support ballasts manufactured by Advance.

PS-600 Mark X series

Hunt Product Code	Model Number	Description	NSN
120 Volt Low Power applications for up to 16 T8's or 20 CFL's			
65500	PS-600-IV Mark X 120V	Preset slide, Controls 600 Watt Maximum, Ivory	
65501	PS-600-WH Mark X 120V	Preset slide, Controls 600 Watt Maximum, White	
65510	PS-600-3W-IV Mark X 120V	Preset slide, Controls 600 Watt Maximum, 3 Way, Ivory	
65511	PS-600-3W-WH Mark X 120V	Preset slide, Controls 600 Watt Maximum, 3 Ways, White	
277 Volt Low Power applications for up to 16 T8's or 20 CFL's			
65520	PS-600-IV Mark X 277V	Preset slide for Modular Mark X systems, Ivory	
65521	PS-600-WH Mark X 277V	Preset slide for Modular Mark X systems, White	
65530	PS-600-3W-IV Mark X 277V	Preset slide 3 Way for Modular Mark X systems, Ivory	
65531	PS-600-3W-WH Mark X 277V	Preset slide 3 Way for Modular Mark X systems, White	
FD Mark X series requires a PS-IFC together with a FD power unit			
120 or 277 Volt applications for up to 8 T8's and CFL's			
71320	PS-IFC-IV Mark X	Preset slide for Modular Mark X systems, Ivory	
71321	PS-IFC-WH Mark X	Preset slide for Modular Mark X systems, White	
71330	PS-IFC-3W-IV Mark X	Preset slide 3 Way for Modular Mark X systems, Ivory	
71331	PS-IFC-3W-WH Mark X	Preset slide 3 Way for Modular Mark X systems, White	
Fluorescent - 120 Volt T8's and CFL's			
71340	FD-30 MASTER Mark X	Master unit for up to 3kw	
71341	FD-30-S SLAVE Mark X	Slave unit for up to 3kw	
71350	FD-20 MASTER Mark X	Master unit for up to 2kw	
71351	FD-20-S SLAVE Mark X	Slave unit for up to 2kw	
Fluorescent - 277 Volt T8's and CFL's			
71360	FD-27 MASTER Mark X	Master unit for up to 2kw	
71361	FD-27-S SLAVE Mark X	Slave unit for up to 2kw	

*** "Mark X" is a Registered Trade Mark for Advance Transformer Line Voltage Dimming Ballasts ***

Dimmers

Luminist Series

- Applications: Incandescent, Fluorescent & Low Voltage.
- Preset slide control.
- Easy-to-operate, smooth-sliding linear control & switch.
- Snap-on plastic cover holds slide securely in place.
- No exposed fins or hardware.
- Standard designer-style.
- Limited two-year warranty

Dimmers

Architectural Dimming Systems

HUNT manufactures easy-to-understand, simple-to-use, economical solutions to high power dimming needs. Controlled lighting includes: Incandescent, Fluorescent, Low-Voltage, Neon and Cold Cathode light sources, as well as, Fan-Speed and Motor Control loads. Custom 50 Hz and 60 Hz available.

For additional information on the following listed controls contact the DSCP Lighting Team.

PR-4 Preset Dimming Control Panel

Designed To Accommodate Diversified Lighting Control Requirements.

- Control 4 to 15 zones of lighting from full OFF to full ON in four different scenes. Each scene may be randomly accessed.
- 7 models meet virtually any lighting control application.
- Zone lighting managed by easy to operate slide controls.
- Four illuminated scene select switches provide easy readability.
- Optional remotes override presets and bring lighting to full brightness levels.
- Single fade rate control for all zones and all scenes adjustable from 0 to 60 seconds.
- Low -Voltage control
- Truly Distinctive Styling
- Elegant, brushed aluminum design with no visible screws.
- Transparent security door panel allows viewing of lighted slide controls inside of door.

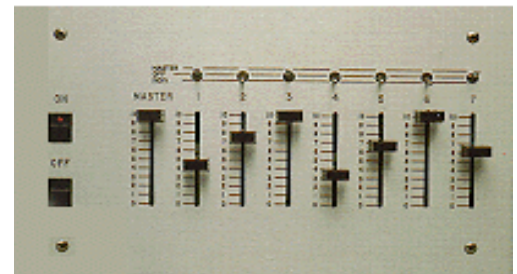

Door is magnetically latched and supported by hinges which are not visible when door is closed.

H-Series Dimming Control Panel

A simple and economical alternative for lighting control.

- Crisp, professional appearance.
- Anodized, brushed aluminum finish with black engraving (custom colors and engraving available)
- Long 60 mm slide potentiometers simplify use.
- Flush mounted.
- Variety of models accommodate most dimming needs.

HUNT Dimming is proud to be an EPA EnergyStar® Buildings Ally.

All HUNT products are made in the U.S.A.

Dimmers

Prewired Dimming Panels

HUNT's Simplicity series prewired dimming panels offer the most cost effective solution to high-power dimming needs. These panels are easy-to-install, and available in either surface or recessed-mounted styles accommodating up to 36 U.L. Listed dimmers with a maximum load of 72 Kw. The panels control Incandescent, Fluorescent, Low Voltage, Neon, Fan Speed Controls or non-dimmed loads.

Features include:

- Dimmers prewired to terminal blocks.
- Thermostatically controlled fans.
- Air cooling vents.
- Engraved identification plates.
- Hinged door on recessed unit.
- Available with up to 36 dimmers
- UL Listed
- NEMA enclosure

Available options Circuit breakers and locking doors
